

MOBILUX 1

Specifically designed to be used in the workshop environment to increase lighting levels for close proximity work, detailed construction and general lighting for that "dark corner of the building"

Due to its carefully considered manufacturer it's an ideal solution for working to the underside of the vehicle when the ramp is in the raised position.

Designed by our own technical department and manufactured in the UK, the product is not only robust to tackle any work environment, but also has the maneuverability to be positioned around the workshop.

- Solid 50mm x 50mm box section steel construction
- Aluminum construction to the lamp unit. A massive 7500 lumen output. High CRI (Colour rendering index) for "true colour match"
- 75W total power.
- 100mm rubber wheels for ease of movement.
- Comes complete with 5m PVC cable and standard BS1363 Plug top
- Market leading Phillip's or Tridonic components
